### WILDFLOWER GARDENING

1	Wild flower Meadow Mixture price list
2-3	Techniques for creating small Wild Flower Meadows
4-7	Individual Wild Flower Seeds (price list)
8	Seed Selections / Wildflower Gardening Kits
9-10	Sowing Tips
11	Cornfield Mixes
12-17	Plant Plug Selections
13-16	Order form
18-19	Individual wildflower plugs
20-22	Bulbs, bulb collections and creating a spring meadow
23-26	Trees, shrubs and accessories
27	Meadow grasses
28-29	Site visits terms and conditions

#### Please Note

- Whilst every effort is made to ensure the information contained within this catalogue is correct at the time of going to print we reserve the right to change details without notice. Information contained herein should be confirmed before placing orders.
- Some of the seeds and bulbs listed within this catalogue may contain toxins and we therefore suggest that they are always kept out of reach of small children.
- This catalogue is printed on environmentally friendly paper.

## WILD FLOWER MEADOW MIXTURES

We are able to offer the following meadow mixtures all rich with colorful Wild Flowers. The contents of the various different mixtures have been specifically selected to recreate the flowery hay Meadows of yesteryear and suit the various soil types likely to be encountered. Full contents of each mixture are listed on our website. All wildflower seeds used in our mixtures are of native wild British origin. Mixtures MM1 to MM11 are also available as grasses only. Please refer to page 27 for details. Our mixtures are also suitable for landscaping and habitat restoration eg. on farmland. For advice call 01452 311525 or use our online "Meadow mix calculator" at [www.wildflowersuk.com/design.asp](http://www.wildflowersuk.com/design.asp)

For quantities over 1kg we can supply custom mixes. Tel: 01452 311525 for advice

## **TECHNIQUES FOR CREATING SMALL WILD FLOWER MEADOWS**

### ***Sowing***

Choose a site that has not been heavily fertilized. The meadow will establish itself best on a poor infertile subsoil. If this is not possible remove the topsoil. It is best to choose a sunny location, (unless you are intending to create a woodland area) in a spot that can be easily reached for mowing. Dig over the area thoroughly and remove all weeds.

Choose a suitable meadow mixture from our range shown on the previous pages to suit your location and soil type. The seed may be sown throughout the autumn, winter and spring. The meadow mix can either be sown alone or with some annual cornfield seeds which have the added advantage of providing a bright array of colour in the first year whilst protecting the more slow growing perennials as they develop. This technique is known as 'nursing'.

Remove any stones from the area before sowing, rake it thoroughly before fine sieving. The plot should then be rolled until level. Water until soaked and lightly sow the seed at the rate show below (mixing with a little silver sand will help to ensure an even spread.)

Sowing Rates: Meadow mixtures: 3-4 grams per square metre

Cornfield annuals: 2 grams per square metre

Pure Wild Flower seed: 1 gram per square metre

Pure Meadow Grass: 5 grams per square metre

For very small 'Mini Meadows' of less than 5x5 metres it is best to sow a mixture of Wild Grasses and then introduce the wild flowers as Plant Plugs at a later date. Use mixture WG11 (F) on page 1 and plant plug selections PS6 on page 17. For further advice call 01452 311525 or use our online "Meadow Mix Calculator" at [www.wildflowersuk.com/design.asp](http://www.wildflowersuk.com/design.asp)

### **Meadow Establishment**

Management will depend upon the mix sown and the type of meadow required, the two main types being spring flowering and summer flowering.

#### ***Meadow mixture only:***

The first cut should be made at about six weeks after sowing, when the grass is about 4 inches high or if the seed was sown in the autumn, six weeks after the first spring growth begins. Continue cutting as necessary until the end of March, and then leave uncut during spring and summer to allow flowering.

As the vegetation starts to die down at the end of summer the meadow may be cut. Leave the cuttings to one side for a day or so to enable any insects to escape and then remove to prevent an increase in fertility. Follow this by occasional cuts throughout the autumn and winter. In the first year it is unrealistic to expect everything to germinate, establish and flower, however, in the second and following years it is possible to adapt a more permanent management regime. Essentially if the meadow is cut early in the year and then left it is possible to encourage spring flowering species to flourish. This would then be followed by a cut in early July. On the other hand if cutting is continued until the end of May a summer meadow can be encouraged which can be left until October before cutting. See also our bulb section for an alternative way of establishing a spring meadow.

### ***Meadow mixture sown with Cornfield Annuals:***

As well as the advantages already described, this technique has an added benefit. During the first year this type of meadow will require very little attention. In fact, following sowing the meadow can be left virtually unattended until the annuals have flowered. Then in late summer the meadow can be mown and the cuttings removed.

### ***Cornfield Annuals:***

Cornfield annuals sown alone in autumn or early spring will flourish on most soil types and will provide a mass of colour throughout the summer of the first year. However, if you wish this type of meadow to re-establish itself naturally from its own seed dispersal then it is essential that the dead vegetation is raked or rotavated into the ground during autumn or early spring of the following years.

### ***Yellow Rattle:***

Yellow Rattle is a particularly interesting and attractive species that is useful when trying to establish and increase the number of wildflowers within a meadow. A semi-parasitic species, it draws nutrients through the roots of grasses and in doing so can help suppress grass growth. Yellow Rattle is best introduced as seed and sown between October and December. Prepare the area by cutting the grass as low as possible and then rake or lightly scarify the ground so that good soil contact can be achieved. Sow at 1gram per sq. meter and lightly roll or trample following sowing, to firm the seeds into the ground. Germination can be expected the following spring. Being an annual it is important not to cut or graze yellow rattle until the middle of the following July when it will have set seed. Where suitable most of our mixtures already include Yellow Rattle. Alternatively it can be purchased separately (see order code ST85 on page 5).

## INDIVIDUAL WILD FLOWER SEEDS

Individual Wild Flower seeds can either be ordered separately from the following price list or as special selections, which for the ease of ordering we have put together to suit most garden situations/wildlife. All wildflower seeds are of native wild British origin unless otherwise stated. Significant discounts can sometimes be offered for quantities of 1kg and over, of certain species. For assistance in selecting the ideal species of your choice, try our online "wildflower finder" at [www.wildflowersuk.com/searchmore.asp](http://www.wildflowersuk.com/searchmore.asp) Alternatively please call 01452 311525 for help and advice.

## SPECIAL SEED SELECTIONS

Selections of individually packeted Wildflower Seeds for special purposes. Each packet contains 1g of individual Wildflower seed. The total weight in each selection is shown below. Please refer to our website for full details.

<i>ORDER CODE</i>	<i>SEED SELECTION TYPE</i>	<i>PRICE</i>	<i>CONTENTS</i>
SS0	Herb selection	£8.35	7g
SS1	Shaded garden corners	£12.55	10g
SS2	Flower Borders	£11.50	10g
SS3	Pond edge	£11.50	10g
SS4	Butterflies	£11.50	10g
SS5	Birds & Insects	£11.50	10g
SS6	Lawn Wildflowers (supplied as mix)	£11.50	10g
SS7	Hedgerows	£11.50	10g
SS8	Annuals/Biennials	£9.40	10g
SS9	Seaside Gardens	£8.35	7g
SS10	Rockeries	£8.35	6g
SS11	Scented	£6.25	5g
SS12	Breeding Butterflies	£7.95	6g
SS13	Bees	£7.30	7g
SS14	Spring Meadow	£9.40	8g
SS15	Summer Meadow	£11.50	10g
SS16	Autumn Meadow	£5.20	4g
SS17	Cottage garden	£7.30	7g
SS18	Attractive seed head	£8.35	7g

## WILDFLOWER GARDENING KITS

Each kit contains enough seed to form a complete wild garden. Simply mark out the different habitats and sow the seed ideally in Spring or Autumn. Please refer to our website for details of full contents.

Miniature garden wildflower kit	WFK1	15m <sup>2</sup>	£12.55
Small garden wildflower kit	WFK2	30m <sup>2</sup>	£24.40
Medium garden wildflower kit	WFK3	70m <sup>2</sup>	£50.95
Large garden wildflower kit	WFK4	130m <sup>2</sup>	£88.05
Very large garden wildflower kit	WFK5	240m <sup>2</sup>	£131.80

## SOWING TIPS

### *Guidelines*

It is possible to sow Wild Flower seeds directly outdoors onto a carefully prepared seed bed. However, it is usually preferable to sow into trays of seed compost. If you do this please try to use one of the brands of 'Peat-free' composts now available. This is important because the commercial extraction of peat is threatening our peat bogs. Place the trays outdoors in a cold glass house or under a sheet of glass will substitute. Once the seeds have germinated, wait until they reach the '3 leaf' stage and then prick out into individual plant pots. Grow on into full plants before planting out into their permanent positions. If you do sow directly outdoors it is important that the seed bed is kept free of all unwanted weeds until the Wild Flowers are well established. The recommended sowing rate is 1 gram per sq. metre.

### *When to sow*

Wild Flower seeds can generally be sown at any time of year. However, it is best to avoid periods of drought or very waterlogged conditions. Varieties requiring stratification are best sown in trays of seed compost in the autumn and placed outside for germination the following spring.

### *Special Treatment*

There is no hard and fast rule as to how long Wild Flower seeds take to germinate. Some types will do so quite readily, whilst others can take a long time. However, germination of certain Wild Flower seeds can be improved by applying special treatments notably:

**1. Scarification:** This is where hard coated seeds can be encouraged to germinate more readily by rubbing lightly between two sheets of sandpaper hence allowing moisture to penetrate more readily. Within our range of seeds this applies to Rockrose, Meadow Cranesbill, Trefoils and Vetches, Clustered Bellflower, Bluebell, Ribbed Melilot and Sainfoin.

Red Campion

Primrose seed will only germinate after several weeks of prolonged cold temperature.

**2. Stratification:** This is where a seed needs to be subjected to a period of chilling before germination will occur. This can be achieved by mixing with some moist compost and placing the seed in a refrigerator for approx. 8 weeks. Alternatively seed can be sown outdoors in the autumn for germination the following spring. Within our range of seeds this treatment applies to Mignonette, Sweet Violet, Bluebell, Weld, Sweet Cicely, Hemp Agrimony, Clustered Bellflower, Wild Carrot, Cowslip, Oxlip, Yellow Flag Iris, Water Avens, Primrose, Yellow Rattle, and Meadow Sweet

You may also find that certain varieties germinate best in different types of compost e.g. seeds of wetland plants will often germinate well in coir based compost, whereas the seed of heather would require a low Ph (acid based) compost

### ***Exceptions***

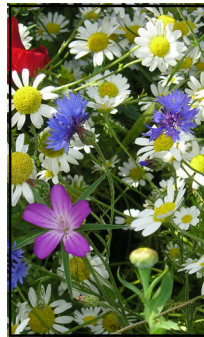

The following varieties of Wild Flower seed should be sown directly outside onto soil and not in trays of compost: Corn Poppy, Corn Marigold, Cornflower, Long Headed Poppy, Wild Pansy, Yellow Rattle, Sweet Cicely, Violet and Meadow Saxifrage. Yellow Rattle, should always be sown together with seeds of grass on which it is a partial parasite.

### ***Depth of Seeds***

Small wild flower seeds should be sown straight onto the surface of the soil or compost and left uncovered. Larger seeds should be covered with a light layer of compost or soil.

***Fertile Soil  
mixture***

***Cornfield  
mixture***

## SPECIAL MIXES

For stunning colour variations in the first summer following sowing, Cornfield annuals can be supplied ready mixed in the ways shown below. Sow at 2-4 gms per square metre

### RED HAZE

Order Code CM1 - *A mixture of red with splashes of blue.*

	75% Corn Poppy	25% Cornflower (by weight)	
Qty	10g	100g	1kg
Price:	£2.90	£13.85	£102.85

### BLUE MIST

Order Code CM2 - *A stunning combination of blue Cornflower freckled with gold.*

	75% Cornflower	25% Corn marigold (by weight)	
Qty	10g	100g	1kg
Price:	£2.90	£16.10	£145.55

### GOLDEN GLORY

Order Code CM3 - *A mix of Corn Marigold with splashes of red Corn Poppy.*

	75% Corn marigold	25% Corn Poppy (by weight)	
Qty	10g	100g	1kg
Price:	£2.90	£15.60	£99.90

### POPPY MIX

Order Code CM5 - *A mixture of Corn, Welsh, Prickly and Yellow Horned Poppies in equal proportions by weight. Sow at 1gm per sq. metre.*

Qty:	5g
Price:	£8.90

## **WILDFLOWER PLANT PLUG SELECTIONS**

### ***Wildflower plant plugs***

We are able to offer 6 different selections of 3cm Wildflower Plant Plugs to suit most garden situations and wildlife. All plants are grown whenever possible in PEAT FREE compost. Having made your choice of plant selections we will pick 4 species on your behalf from the appropriate list shown overleaf and dispatch to you a total of 12 plants (3 of each species) per selection ordered. Please allow 28 days for delivery.

### ***How to Order***

Simply choose the plant selections that you require (from page 17) taking note of the minimum order quantities. When you have made your choice please complete the enclosed order form on pages 13/16.

### ***Dispatch***

Wildflower plants and plant plugs can be ordered at any time of year but will only be dispatched between mid April and 31st October. For Autumn dispatch please ensure orders reach us before mid September. Dispatch of plants may be withheld during exceptionally hot weather. Please state clearly if there are any periods when you wish us to avoid dispatch eg. holiday periods.

### ***Planting***

On receiving plants immediately take them out of the box, water well and stand in a shady place to recover for a day or so. Plant plugs should then either be placed in 3 inch pots containing a soil based potting compost or lined out approx 6 inches apart in a carefully prepared nursery bed. After this they should be kept well watered and left to develop for several months before moving to their permanent planting position. Wildflower plants can be planted straight out on receipt.

Please refer to 'plant plug selections available' on page 17.

Ladies Bedstraw

Please refer to page 12 for further advice regarding how to order the above selections.

PRICES (Minimum order quantity 2 plant selections)

2 selections (24 plants)	£23.80
3 selections (36 plants)	£34.10
Alternatively buy 5 selections (60 plants) for the price of 4	£45.45

Please refer to page 18 and 19 if you require trays of individual species.

All plant species supplied are individually labelled!

# INDIVIDUAL WILDFLOWER PLANT PLUGS

The Wildflower species opposite have been chosen to suit a wide range of habitats and are all available as well developed plant plugs (approx 20 ml) throughout the year. Grown from limited generation seed of Native British origin and whenever possible in PEAT FREE compost, our plugs provide a cost effective method for the use of Wild flowers in landscaping or Habitat Creation schemes. Clients include schools, landscapers and conservation groups.

Most plugs are available from stock, however, please allow 28 days for delivery. Plants can be ordered at any time of the year but will only be dispatched between mid-April and the end of October.

## *How to order*

Simply complete the order form on page 13/16, stating clearly the order code, quantity required (see further details listed below), your name and address and any periods when you would wish us to avoid dispatch. For large orders of over 1000 plugs, please call first to check availability.

## *Prices*

Plugs may be ordered as single trays of 10 or 20 of any one species or for larger quantities in multiples of 50 of any one species at the prices shown below:

<b>Total Quantity:</b>	<b>Cost</b>
Trays of 10 plugs	£14.45
Trays of 20 plugs	£17.85
50-150 plugs	£29.95 per tray of 50
200-500 plugs	£22.45 per tray of 50 (25% discount)
550-1000 plugs	£20.35 per tray of 50 (32% discount)
over 1000 plugs	£19.45 per tray of 50 (35% discount)

Please refer to pages 12 and 17 if you require small quantities of mixed plant plugs.

**Note** Some species have foliage which dies back either partially or completely during the months e.g. Meadow Cranesbill.

# BULBS, CORMS AND RHIZOMES

## ***Introduction***

The use of bulbs will enable you to create a spring meadow easily within an area of your existing lawn without the need for any rotavation. The meadow will also be relatively quick to establish and easy to maintain. Simply plant the bulbs beneath the surface of the turf following the instructions given below. You may wish to add other spring/early summer flowering species such as Cowslip, Birdsfoot trefoil, Musk Mallow or Meadow Buttercup, and Yellow Rattle.

See our range of seeds and plant plugs for further details. Bulbs such as Bluebell, Winter Aconite and Wood Anemone are also ideal for shady garden corners. Our bulbs are intended for garden use and in case you are concerned we have made every effort to ensure that the bulbs we supply have not been dug from the wild and suppliers have made a written confirmation of this.

## ***How to order***

Simply choose the bulbs you require (see opposite). Order in multiples of 10 and when you have made your choice please complete the enclosed order form on page 13/16 clearly stating the order code and quantity of each required

## ***Dispatch***

Bulbs can be ordered at any time of year but will only be dispatched between mid-October and the end of November for autumn planting. For Autumn dispatch please ensure orders reach us by the end of September.

## ***Planting and Maintenance***

On receipt of your bulbs remove from packaging and if possible plant immediately or at least within 2-3 days having stored in a cool dry place. Small bulbs should be planted about 2 inches beneath the soil surface and large bulbs e.g. Bluebell and Wild Daffodil about 4-6 inches beneath the surface. Wood Anemone should be placed horizontally about one inch beneath the surface. Plant bulbs in clusters and not individually. After flowering do not cut off the foliage immediately but leave until it appears brown and dried out.

## BULBS AVAILABLE

### ***Order Code: NB1***

Bluebell (*Hyacinthoides-non-scripta*) Blue scented flowers from April-June. Ideal for a dry shady, woodland setting.

Price: 10 bulbs £2.80 50 bulbs £13.15 100 Bulbs £24.50 1000 Bulbs P.O.A.

### ***Order Code: NB2***

Snowdrop (*Galanthus nivalis*) White nodding flowers from Feb-March. Plant in a dry or damp shady area as part of a woodland or Spring Meadow setting.

Bulbs will be supplied freshly dug to give as good results as in the green.

Price: 10 Bulbs £2.55 50 Bulbs £11.30 100 Bulbs £19.55 1000 Bulbs £139.95

Also available “in the green” – Price: £20.95 for 100 plants

*NOTE: orders must be received by Feb 28th for March dispatch.*

### ***Order Code: NB3***

Star of Bethlehem (*Ornithogalum umbellatum*) Clusters of white star shaped flowers in May. Suitable for a dry Spring Meadow.

Price: 10 Bulbs £2.75 50 Bulbs £12.55 100 Bulbs £23.65 1000 Bulbs £118.45

### ***Order Code: NB4***

Wild Daffodil (*Narcissus pseudonarcissus*) Scented yellow flowers in April and May for a dry, shady woodland setting or Spring Meadow.

Prices: 10 Bulbs £4.05 50 Bulbs £18.00 100 Bulbs £34.90 1000 Bulbs P.O.A.

*(please order by early August for Autumn dispatch.)*

### ***Order Code: NB5***

Winter Aconite (*Eranthis hyemalis*) Early yellow flowers between January and March for dry shaded woodland. Plant in leaf mould.

Prices: 10 Corms £3.35 50 Corms £14.20 100 Corms £22.40 1000 Corms £144.00

### ***Order Code: NB6***

Wood Anemone (*Anemone nemorosa*) White star like flowers between March and May. For dry woodland and shady areas. Plant in leaf mould.

Prices: 10 Rhizomes £2.90 50 Rhizomes £12.55 100 Rhizomes £23.05 1000 Rhizomes £156.25

**Order Code: NB7**

Wild Tulip (*Tulipa sylvestris*). Bright yellow flowers in April. Plant in grass or the border.

Prices: 10 Bulbs £5.90 50 Bulbs £24.60 100 Bulbs £41.95 1000 Bulbs £309.75

**Order Code: NB8**

Snakes Head Fritillary (*Fritillaria meleagris*). Chequered red/purple to cream nodding flowers in April. Plant in a bright area in a damp soil that will not dry out.

Prices: 10 Bulbs £2.90 50 Bulbs £11.85 100 Bulbs £20.95 1000 Bulbs £115.50

**Order Code: NB9**

Summer Snowflake (*Leucojum aestivum*). White flowers like large snowdrops in April and May. Plant in moist or boggy areas.

Prices: 10 Bulbs £3.35 50 Bulbs £16.10 100 Bulbs £25.35

**Order Code: NB10**

Wild Garlic/ Ramsons (*Allium ursinum*) Brilliant white flowers in April or May, will grow and spread in moist soils in a woodland setting.

Prices: 10 Bulbs £3.50 50 Bulbs £16.90 100 Bulbs £26.45 1000 Bulbs P.O.A.

Wild Daffodil • Snowdrop

Bulbs

10 of each (total 50 Bulbs) £15.20

20 of each (total 100 Bulbs) £21.95

## TREES AND SHRUBS

### ***How to Create a Mini Woodland Habitat***

Winter is the time for planting bare rooted trees and shrubs - an ideal way of creating a woodland habitat which is something that even the smallest of gardens can incorporate. This might consist of a layer of small trees, underplanted by shrubs, and at ground level (the woodland floor) a mixture of specialist plants which will thrive in shaded conditions (see seed section for further details). In larger gardens a third layer of taller trees may also be incorporated. For this purpose we can offer a range of bare rooted plants which fall into 3 broad categories as follows:

### ***Native Woodland Category***

Tall growing trees (from 5 metres upwards) for medium/large gardens and consisting of entirely native varieties.

### ***Wildlife Cover Category***

Suitable for smaller gardens, a mixture of Trees and Shrubs selected specifically to provide cover and food for wildlife, these species can be used for the underplanting or simply for creating a woodland edge habitat to about 5 metres high. They will also tolerate a wide range of soils and conditions and can be introduced to hedgerows to create diversity.

### ***Hedge Plant Category***

The species within this category are suitable for creating a "Wildlife Hedge" which will be of maximum benefit to roosting and nesting birds and with which a number of animal and flower species should soon become associated.

### ***How to order***

Simply select the Trees/Shrubs that you require from any of those listed on the following pages and complete the order form on page 16.

### ***Small Mixed Orders***

**Please note that we have a Minimum Order quantity of 5 Trees/Shrubs per order. The cost of 5 Trees is £17.95.** Additional Trees can be ordered at an extra cost of £1.23 each.

### ***Large orders***

For large orders where you require quantities of more than 30 of any one species, the prices are those stated on the next 3 pages.

### ***Dispatch***

Trees/Shrubs can be ordered at any time of year but will only be dispatched once they have become dormant in the autumn (usually November-March). Orders placed during the dormant period will normally be dispatched within 28 days. All items offered are subject to availability. If we are unable to fulfil your order requirements you will either

<b>SITE VISITS AND PLANTING SCHEMES</b>
---

We are able to provide a planting advisory service whereby we will devise designs and planting suggestions tailored to your plot and requirements. During our initial communication with you we will discuss your needs, our fees and timescale. Site visits and assessments are available, at the rates shown below. A full written site report is available following our visit at extra cost. Please note that normally a minimum of 2 weeks notice is required for site visits.

	COST Per Hour of “on site” and travel time	COST Per Mile of distance traveled
1st June - 30th Aug 1st Nov - 28th Feb	<b>£27.95</b>	<b>£0.80</b>
1st Mar - 31st May 1st Sep - 31st Oct	<b>£33.35</b>	<b>£0.95</b>

## TERMS AND CONDITIONS

1. Payment must be sent with order.
2. The catalogue supplied cancels all previous catalogues.
3. All products listed are subject to availability on receipt of order.  
If we cannot fulfill your order you will be notified by mail or telephone.  
Occasionally it may be necessary to provide alternative products.
4. Seed is supplied nett weight.
5. Goods remain the property of *Yellow Flag Wildflowers* until payment is made in full.
6. All our products are of guaranteed high quality and obtained from reputable sources. Please report any damages or loss immediately to *Yellow Flag Wildflowers* and we will either provide replacements or refund payment.
7. Order cancellations can only be accepted if we are informed in writing within 7 working days of customers receiving goods. Goods must then be returned to us immediately at the customers expense and in good condition. We will then refund the cost of goods in full.
8. The performance of our products will be limited to storage and growing conditions and we cannot be held responsible for non-germination or any consequential loss due to conditions beyond our control.
9. Seeds will be dispatched all year round usually within 7 working days by post or carrier.
10. An order placed with us constitutes acceptance of the above Terms and Conditions by the purchaser.
